Here you go:

Final UIC Permits for Dewey Burdock

- EPA Region 8 plans to issue final UIC Class III and V area permits for the proposed Dewey Burdock uranium in-situ recovery (ISR) project in August, 2020.
- Since 2017, the EPA has received extensive public comment and input during tribal consultations on two Underground Injection Control (UIC) draft permits and one associated proposed aquifer exemption for Powertech's proposed Dewey-Burdock uranium ISR site located near Edgemont, South Dakota.
- The UIC Class III area permit would be for injection wells for the in-situ recovery of uranium. The UIC Class V area permit would be for deep injection wells that will be used to dispose of ISR process waste fluids into the Minnelusa Formation.
- EPA will also issue a final aquifer exemption decision in connection with the Class III Area Permit to exempt the uranium-bearing portions of the Inyan Kara aquifers.

Why don't send me some bullets (keep it short and sweet) and I'll add it in.

Thanks!

Hi Darcy: to the extent that we/Jag need to let the Governor know of our intent to issue final permits later this year, we may want to give him a heads up on Dewey Burdock.

Do we have anything for the WD?

Thanks

Subject: Call with SD Governor

Hello all,

The call with SD Governor is scheduled for next week and I request that you provide any information that Greg should provide to the Governor by no later than EOB on Monday (06/15). We request you to provide any specific information (Good and bad) on

- Grants
- Brownfield Projects
- Any major permitting, rulemaking or enforcement/lawsuits activities that State Governor may be interested in
- NEPA comments that we have submitted where state may have some interest
- Major Superfund projects that state may be interested
- Ag Issues
- Outreach specific to the state

Please let me know if you have any questions.
